PERSONAL STATEMENT

I am a final-year undergraduate at SLIIT specializing in information Technology, with nearly one year of industry experience. I am passionate about transitioning into Data Engineering and Data Science, with a strong foundation in SQL, Python, and data handling.

I have experience working with data-driven systems, supporting data workflows, and troubleshooting technical issues. I am particularly interested in building efficient data pipelines, ensuring data accuracy, and enabling data-driven decision-making while further developing my skills in ETL and data warehousing.

EDUCATION

2022 - 2026

Sri Lanka Institute of
Information
Technology

BSc (Hons) in Information Technology
Specializing in Information Technology

- Courses: Database Management, Programming Applications, Computer Fundamentals, Probability & Statistics, and Mobile Application Development.

2011 - 2022

Dharmaraja College

G.C.E. Ordinary Level & Advanced Level(Biological Science Stream)

- Obtained 9 Distinctions in Ordinary Level Examination
- Passed Advanced Level Examination

WORK EXPERIENCE

2025- Current

Freelancer

Freelancer

Working as a freelancer on real client projects on web developments, digital developments, and data management. Creation of dashboard using powerBI

2024-2025

All in one holdings

Intern- Software Engineer

Completed a Software Engineering internship at All In One Holdings, where I actively contributed to multiple client projects involving real-time web development. Gained hands-on experience in project management, team collaboration, and delivering functional web solutions for businesses using modern technologies such as *React.js*, *Tailwind CSS*, *WordPress*, and *PHP*.

PROJECT EXPERIENCE

2025 August

SLIIT

Electric Vehicle Dashboard

- Individual Project For Data Science module for SLIIT.
- An PowerBI Dashboard developed to analyze EV adoption trends in the USA (2010–present).
- Contribution- Built visualizations for state-by-state adoption, top 10 makes & models, and BEV vs PHEV market share & incentives
- **Skills- Tableau, Microsoft Excel, Data Visualization, KPI Storytelling, Dashboard Design**

2025 March

AirB&B Project

- Data Warehousing and Business Intelligent project
- A comprehensive BI system developed using a real-world Airbnb dataset to support multidimensional analysis and reporting across multiple platforms. Contributions:
- Designed and implemented a data warehouse from source to staging to star schema, developed ETL pipelines with SSIS, built an SSAS cube with hierarchies, and created interactive reports using Excel OLAP and Power BI
- **Skills- SQL Server, SSIS, SSAS, Power BI, Excel OLAP, ER modeling, ETL, DAX**

2025 August

SLIIT

Design and Implementation of an Agentic AI System for Culture Travel Guide Management

- Personal project
- Multi-agent AI system, Langue, that provides personalized cultural and language guidance for travelers. The agent retrieves a country's spoken language, common phrases, pronunciation tips, and cultural insights, including food, activities, and traditions.
- **Skills- Multi-Agent Systems, LLMs, NLP, Information Retrieval, Security Protocols, Responsible AI, System Design, Python, API Integration**

2026 April

SLIIT

E Pal Ecommerce System (Micro Services)

- Team project- Developed a 5-service e-commerce microservices architecture (Product, User, Order, Payment, Inventory) using Spring Boot, REST APIs, and MongoDB. Tested and documented APIs using Swagger/Postman.
- Contributions - Development of the entire project.
- **Skills- Springboot, MongoDB, Postman, Swagger**

2025 June- Current

Sienna Retreat

Hotel management Web For Sienna Retreat

- Individual project for client
- Web application development and design done for Sienna retreat consisting of Google auth, client based booking system, monitoring interfaces, payment gateways and chatbot.
- **Skills- Chatbot, Firebase, Mysql, Javascript, React, Tailwind.css, Figma**

2025 April

SLIIT

Skill Horizen- Learning Skill Management and Social Web App

- Team project- For PAF module .
- An learning skill management, sharing and social media web application developed for Sri lankan institute of information technologies PAF module
- Contributions- Development / Design of the entire backend and the google oath2
- **Skills- Reactjs, Vite, Springboot, GitHub and Mongodb**

SKILLS

Programming Languages

- Python, JavaScript, PHP, Java – Fluent

Web & Frameworks

- Python, JavaScript, PHP, Java – Fluent
- MERN Stack – Intermediate

Frontend & Design Tools

- HTML, CSS, Tailwind CSS – Fluent
- Figma – Intermediate

Data & Analytics

- Power BI – Intermediate
- Tableau- Intermediate

AI / ML / DL

- Python (AI / ML / DL) – Intermediate

Public Speaking

- ToastMasters Level 1 completed
(Motivational Strategies Pathway)

Big Data and Databases

- SQL Server, MySQL, MongoDB, PostgreSQL, NoSQL, Data Warehousing, ETL (SSIS)

Data Engineering & Cloud

- Data Pipelines, ETL/ELT, AWS (S3, EC2), Azure, Docker

CERTIFICATIONS

- SLIIT- Stage 1 - AI/ML Engineer
- Alison- React JavaScript - Fundamentals to Coding & New Beginnings
- Alison- PHP - Basics and Fundamentals
- Cisco - IT Support Certification
- Cisco - IOT With packet tracer and cisco
